SAFETY DAY 6 JUNE 2023

FAILING SAFELY

When an undesirable event happens where barriers were in place and worked as intended and as a result no one was harmed, we call this 'Failing Safely'.

BLENDCOR SAFETY DAY

On the 6th of June, Blendcor hosted their annual Safety Day. The theme for 2023 was "Failing Safely" where we analysed Safety Measures that are already in place in our operations.

These measures act as a safety net in the case of any system failures. Naledi Makelo from our HR Department touched on the Feeling Wheel in relation to the importance of our emotional state at work.

Desmond Perumal and Suren Naidu talked us through past projects that were conducted safely and successfully.

The HSSE department designed 2 Safety Scenarios that were enacted by our SHE Reps. These scenarios demonstrated how existing safety measures could save a life in the case of an accident or human error.

- 1) Drum to Drum transfer (Spill)
- 2) Hot Work Scenario (Fire was controlled)
